Disclaimer:
This project was supported, in part, by grant number 90LL0002-01-00, from the Administration for Community Living, U.S. Department of Health and Human Services, Washington, D.C. 20201. Grantees undertaking projects under government sponsorship are encouraged to express freely their findings and conclusions. Points of view or opinions do not, therefore, necessarily represent official Administration for Community Living policy.
Our Mission

To reach out to and empower those affected by limb loss to achieve their full potential through education, support, and advocacy, and to promote limb loss prevention.
Organizational Overview

• The leading donor-supported, national non-profit organization serving the limb loss community
• 30th Anniversary
• Headquartered in Manassas, VA with a branch office in Knoxville, TN
• 19 staff members
Organizational Reach

• More than 300 support groups in our network
• Over 1,000 Certified Peer Visitors across the country
• 65,000+ friends in database
• 100,000+ Facebook community
• 800,000+ Web site visitors
Limb Loss Community

- 2.1 million persons with limb loss
Amputation Levels

Level of Limb Loss

35%

65%

Lower Limb

Upper Limb
Causes of Amputation

2012 - 131,510 amputations performed in US

(Source: Healthcare Cost and Utilization Project [HCUP] Nationwide Inpatient Sample [NIS], 2012.)
Adapting to Limb Loss

- Variety of assistive technologies
Living with Limb Loss

- Range of functional abilities
- Other health conditions/disabilities:
  - Diabetes
  - Depression
  - Traumatic Brain Injury
  - Post-Traumatic Stress
Availability of Patient Education Materials

- Prior to Amputation
  - 53% - little to no information about prosthetics
  - 59% of no source of information about prosthetics

Certified Peer Visitor Program

- First peer visitor training held in 1993
- Now over 1,000 certified peer visitors and growing!
- Extensive matching process
- Can request a peer visit online or by phone
- Non-biased and non-affiliated
Youth Camp

- Free
- Traditional summer camp
- Ages 10 - 17
- Clarksville, OH
- ~130 campers
Limb Loss Resource Center

• Serves thousands of individuals each year
• Provide **free** educational resources
• Call Center
  – Monday-Friday 8:00am-5:00pm
  – Email, Web, and Phone Inquiries
• Website
  – “Library” of materials available
• Publications
Sample Resources

• Customized Information Packets
  – Specific to patient’s needs
    • E.g., Phantom Pain, Wound Care, Shoes

• Local Resources
  – Home modifications
Publications

- InMotion
- First Step/Premier Paso
- Insurance Coverage and Reimbursement Guide
- Brochure Series
  - First Step
  - Pain Management
Benefits of Publications

• Non-biased and patient centered approach
• Reviewed by clinicians and consumers
• Free
Benefits of inMotion

Overall satisfaction with content of *inMotion*, 2012-2015

- **Percent**

  - Above Knee
  - Upper Limb
  - Hemipelvectomy/Hip Disarticulation
  - Caregiver
  - Pediatric Population
Amputee Coalition Resource Center

The “Gateway” of the Amputee Coalition
Who We Are/What We Do

- We serve the limb loss community, their families, their friends, caregivers, hospitals, rehabilitation centers, social service workers and the public as a whole.

- Anyone is welcome to contact the Resource Center for assistance.

- Our resources and materials are provided free of charge to individuals.
Contact us

• Inquiries come into the Resource Center in a variety of ways.
• Via our toll-free number 1-888-267-5669
• Via our website www.amputee-coalition.org
• Via the postal mail and the occasional drop-by at either of our offices.
• Office hours are 8am-5pm (EST Mon-Fri).
Who Contacts Us?

– Anyone is welcome to contact us.

– We receive inquiries, questions and comments from all 50 states as well as internationally.

– Limited support for international requests.
By The Numbers

– Each inquiry or question the Resource Center receives becomes a case.
– Each case is researched, fulfilled and documented in our database.
– In 2015, we opened 4,361 cases (an average of 365 a month), and served 6,005 individuals.
– So far in 2016 we are averaging 460 cases a month, serving 491 individuals per month.
Same, but different

• The Resource Center shares some similarities with 211 centers and CIL’s.
• We field calls from the public, but we are not a traditional “call center”.
• Small staff (3), no call queue system, not on the phone constantly (usually).
• Majority of our time is spent researching cases.
However....

• When someone calls, we stop everything to focus on the caller and their needs.

• Calls can be as brief or as lengthy as the caller’s need dictate.

• Shortest call (30 seconds) Longest 1 hour, 45 minutes.
Other differences

• Create resources
  – First Step
  – Your New Journey
  – In Motion magazine
  – Insurance/Reimbursement Guide
  – Amputation Level Specific Information
Working with you

• We refer our clients everyday to CIL’s, 211 centers and other specialized information centers.

• Our clients very often are looking for local and specific resources.

• As we are a national organization, we rely heavily on you to connect our clients to programs and services in their community.
Common questions

• Two overriding popular questions

• New Amputee Information

• Funding resources
New Amputee Information

• Amputation may have been very recent.
• “I’m not even sure why I’m calling.”
• “Where do I go from here?”
• Truly a new journey
• Finding us via a google search.
Funding

• Assistance with the co-pay of a prosthetic device.
• Can and do cost in the thousands of dollars.
• Other funding requests, home and vehicle modification.
• Help with social services and everyday bills.
“Difficult calls”

• We have our share of people who are less than pleased with our services and/or organization.

• Belligerent, angry at the world.

• Difficult calls can take other forms.....
What do we say?

• Victim of an automobile or motorcycle accident. They are at the hospital now. No memory of the accident and they will soon come out from anesthesia. They had a below knee amputation. How are we going to tell them? What do we say?
What do I do now?

• A person who has worked for 40 years in the same job has lost her leg due to complications due to diabetes. She is unable to return to work. How can she pay her mortgage? What does she do now?
What about Grandpa?

• A parent calls and ask how to tell their five year old son or daughter that Grandpa no longer has his arm?
Now what?

- A man had both legs removed due to a vascular condition. He tells us he was sent home with a wheelchair and our phone number. His nearest family member is 200 miles away. Now what?
Not uncommon, but still unique

- Over 2 million people live with limb loss.
- More than 28 million people are at risk.
- 185,000 amputations a year in the U.S.
- More than 500 a day.
Numbers don’t matter

• Incredibly personal and life-changing for the individual.

• No right answer, no time frames on recovery or rehabilitation.

• Courage
“Those calls”

• ‘So, how long do I have to live?”

• What would Benjamin Franklin do ?”

• Medical/Legal Advice
Words matter

• What do I call you?

• Disabled or no?

• Courage (reprise)
