ACL/AIDD Activities

Opportunities for individuals with intellectual and developmental disabilities
Opportunities for individuals with intellectual and developmental disabilities

- The Administration for Community Living and the AIDD network are striving to improve opportunities for individuals with intellectual and developmental disabilities.
  - Success and participation in post-secondary education
  - Increasing employment opportunities
  - Access to other supports and services

- The NWD System can support states in serving people with intellectual and developmental disabilities as they transition into adulthood.
Among the strongest predictors of post-secondary success for young people is whether or not they earn a diploma. Only 34% of students with developmental disabilities, 40% of students with multiple disabilities, and 56% of students with autism graduated from high school with a regular diploma during the 2007-2008 school year.
Employment Opportunities

- According to the March 2014 Current Population Survey (CPS), the proportion of the population of people with disabilities who are employed is estimated to be 16.4 percent compared to 63.9 percent for people without disabilities.
