- Kitty Engler, Bureau Chief

Go Long Consulting

- Charla Long, President
- Melissa Walker, Principal Researcher
Opening Activity
**Workshop Activity 1: Identify Challenges**

• QUESTION – When thinking about your current LOC criteria and process, what are the three to five most significant challenges or issues experienced by the populations you serve?

• Write one idea per notecard
  - No less than 3 cards
  - No more than 5 cards
  - Please write legibly
Workshop Activity 1: Share Findings
Today’s Session Agenda

1. Workshop Activity 1
2. Background
3. National Landscape
4. Stakeholder Engagement
5. Co-Creating a New NF LOC Model
6. Workshop Activity 2
7. Key Learnings, Best Practices, Recommendations
Background
Why Now?

• Serving 65,000 Missourians
• No substantive updates since 1982
• Inherent problems with current model
  • Exacerbated when budget shortfalls forced move from 21 to 24 points
• Missouri’s aging demographic
• State Auditor’s Office recommendation
Demographic Information

- Medicaid under the LTSS program pays 63% of all institutional care for the state of Missouri
- MO spends around 58% towards HCBS
- 50% increase in elderly needs in approximately the next 15 years
- Other issues and challenges
Missouri’s Need for Technical Assistance (TA)

• Robert Wood Johnson funding through Princeton University’s State Health & Value Strategies (SHVS)

• Funded to deliver in several key areas:
  ▪ National scan and comparison
  ▪ Deep dive interviews
  ▪ Key Stakeholder public forums
  ▪ New model for Missourians
  ▪ Summarize findings
Begin With The End In Mind

Overarching Goal: Create a new LOC model that:

1. Ensure access to care for most in need.
2. Use limited state resources on those most in need.
3. Ensure individuals able to live in the community are not inappropriately placed in a more restrictive setting.
1982

1st Significant Change to LOC – Move from 18 to 21 points

Added to Missouri Regulations

2001

2nd Significant Change to LOC – Move from 21 to 24 points

Awarded Robert Wood Johnson Foundation Grant

2017

NF Level of Care Eligibility Criteria

2018

January to June
Research and Discovery
July to December
Stakeholder Engagement and Model Formation

2018
National Landscape
National Landscape Findings

• Conduct a national scan of existing LOC research
• Evaluate methodology, tools, and processes in all the states
  ▪ LOC eligibility criteria
  ▪ Functional assessment types used
  ▪ Assessors/Determinators of services and supports
  ▪ Scoring systems
• Research strategy
  ▪ Phone calls, review of statutes/regulations, published reports and findings, website scan
• Provided a 50-state library of LOC eligibility criteria
What Tools Are Leveraged?

• Initial, Specialized and Cross-Cutting tools
• Tools include homegrown tools (LOCET), national assessments (interRAI), or customized tool (ArPath)
• Length and complexity of tool used varied significantly
• Paper, electronic/online form, web-based software

Who Assesses and Who Determines?

Assessors include:
- Area Agencies on Aging (AAA)
- Aging and Disability Resource Centers (ADRCs)
- Managed Care Organizations (MCOs)
- Nursing facility/hospital case managers
- State employees
- Independent contractors
- Certified assessors

Determiners include:
- Physicians
- Registered nurses
- Certified assessors
Four Framework Systems

• Points
• Doorway
• Algorithm-based
• Blended

How Does Someone Meet Eligibility?
Stakeholder Engagement
Feedback Sessions Timeline

• Initial Meeting: May 4, 2018
• Public Forum 1: June 25, 2018
• Public Forum 2: July 13, 2018
• Public Forum 3: November 27, 2018

• Five state deep dives for “trusted discovery”
  ▪ Arkansas, Indiana, Louisiana, North Carolina, Wisconsin
• First draft of proposed model framework
  ▪ Solicited input
  ▪ Key Stakeholder meetings
  ▪ Online feedback survey
Notecard Activity Revealed Challenges

- Both process and framework issues

- OR -
Get Perspective on **Process Challenges**

**State Staff**
- System is subjective and inconsistent
- Assessment tool too long
- Client can be coached
- SNFs LOC still paper driven

**HCBS Stakeholders**
- Assessor training-inconsistent and different outcomes
- Self report information-verify information, not honest
- NF and HCBS disparity in process

**SNF Stakeholders**
- Slow response after assessment completed ~90 days
- Lack of understanding of assessment (inaccurate/incomplete)
- Backlog/lost forms at COMRU
Get Perspective on **Framework Challenges**

**State Staff**
Disconnect between criteria buckets and actual needs
- Frail Elders not identified and do not qualify under current eligibility criteria
- Mentally disabled have advantage
- # of meds should not relate to 9 score in scoring system

**HCBS Stakeholders**
- Mental health not adequately addressed in current system
- Point system doesn't work because allows “in” those that should not be, should focus on age and diagnosis

**SNF Stakeholders**
- MDS coding and NF LOC definitions do not match each other
- Residents unsafe at home but do not qualify
- Add Cognition and Safety categories to consider mentally ill and memory challenges
- Not about # of meds but the underlying condition that requires the medication
- Different assessed needs for mentally ill (MI) young person and MI frail elder which leads to inconsistent criteria
- Personal care needs not a good scale
Overall Framework Changes

• Overwhelming support for doorway-type system
• Like the doorway approach because tailored and multi-functional
• Operationalize a blended doorway with points system
• Doorways should include Dementia, MI, I/DD, Disabled Adult, Frail Elder, ST Rehab
Missouri's Level of Care Eligibility Criteria
What *indicators* put someone in a place where they need to receive their care in a nursing home environment?
Draft Model Framework

Shared first draft of new LOC criteria

• Five doorways + points

Frail Elderly  Physical Limitations  Dementia  Mentally Ill  I/DD or ADI
Sample Doorway: Frail Elderly

**Definition:** Individuals age 80 and over with a decreased ability for independent living due to chronic health problems, physical limitations, and/or impaired mental abilities.

**Criteria Eligibility**
- ADLs (Activity of Daily Living) e.g. Bathing, Mobility, Transfers, Dressing, Grooming, Toileting, Eating
- IADLs (Instrumental Activities of Daily Living)- Meal prep
- Safety-ADLs impacting health, Fall risk (bathing, transfers)
Stakeholder Meeting #2: Did We Get It Right?

What *indicators* put someone in a place where they need to receive their care in a nursing home environment?
Review Proposed Indicators

Placed dots by up to six items which should stay the same in the final framework

Placed up to three post-it notes with ideas for improvement (additions, deletions, changes)

Offered suggestions for scoring and provided more information in online survey
Solicited Suggestions for Scoring System

- Break into small groups by doorway
- Use the draft as the basis for your work
- Propose an answer to these two dilemmas:

  How would your group recommend this doorway be scored?
  If validation is needed, how would you do this?
Scoring Indicators

• How do you score the various indicators listed?
• When looking nationally, the range of options include:
  ▪ Minimum, moderate, extensive
  ▪ 0, 3, 6, 9 intervals
  ▪ A + B + C + D (must meet all)
  ▪ Must meet one
• Allowed to have different scoring by doorway
  ▪ Not all must be weighted the same
Synthesized Input of Stakeholders
## Sample Doorway Feedback - Frail Elderly

<table>
<thead>
<tr>
<th>Definition</th>
<th>Change age, could be tiered age: 65-70, 70-79, 80 and up; maybe start at age 75, start at age 70 since many are in poor health, start at age 65, no age limit because discriminatory</th>
<th>Staff</th>
<th>HCBS</th>
<th>SNFs</th>

Key Takeaways from Feedback

- Certain types of people everyone agrees needs help
- Easy entry doorway needed for these individuals

- Potential for exclusion of some participants
- Technically difficult and expensive to implement with current assessment and web-based system
Co-Creating a New NF LOC Model
Common Sense Approach

Asked ourselves four essential questions:

In the current system,
1. What’s working?
2. What’s not working?
3. What’s missing?
4. What does research say?
# What We Heard

## What’s Working?
- Mobility
- ADLs
- IADLs
- Rehabilitation

## What’s Not Working?
- Not Measuring the “Root”
  - Monitoring
  - Restorative
  - Number of medications taken
  - Physician ordered diet

## What’s Missing?
- Looking at cognitive and behavioral separately
- Way to help those that obviously need services easily get into system

## What Does Research Say?
- ADLs are what truly matter – all states emphasize this
- Those with updated systems recognize cognitive and behavioral separately
- Blended algorithm models with variable point values makes most sense
- Updating more than every 30 years helps

Scoring Process

• Category-specific questions in assessment
• Points based on each question
• Common sense trigger questions
  ▪ Late stages of dementia, bedbound, quadriplegic
Look at Actual Missourians

Right services for the right people at the right time in the right setting

That’s a lot to get Right!
Case Studies

• Study own residents, use real Missourians
• Conducted 100+ case studies
• Analyzed different scenarios
  ▪ Those in the system
  ▪ Those not in the system
Case Study #1

Maria
89 year old female
Currently unable to make it through the prescreen, only getting a score of 12
- She becomes ill. She does not receive any treatments.
- She needs assistance bathing.
- She ambulates without assistance, but is a high fall risk.
Case Study #2

Thomas
57 year old male
Eligibility and level 2 screening process. Currently admitted into a SNF.

• Hospitalization for mood and behaviors – schizophrenia
• Hyperactive, withdrawn
• Wheelchair for long distances only
• Diabetes and requires blood sugar testing
• Requires assistance for all ADLs
Case Study #3

Andy
34 year old paraplegic

- Hospitalized from pressure ulcer
- Total assistance with ADLs
- PT/OT required
- Catheter
Katie
29 year old woman with fibromyalgia
• Patient reported complete independence with all ADLs
• Current LOC is 30
  • 9 of those points coming from medication
  • 6 coming from the use of a CPAP.
Provider Homework:
Gather own case study scenarios to test

Provider Case Study Testing

- Draft algorithm distributed via listserv and through provider associations
- Pilot test own case studies to determine potential impact
- Providers submit findings and outcomes using “Send Feedback” link on LOC Transformation website
Key Learnings, Best Practices, Recommendations
Technical Assistance Area: National Scan Findings

- Need to create a national database of LOC models
- Recommend funding by philanthropic organization
- Will assist in the sharing and adoption of best practices
Technical Assistance Area: Stakeholder Engagement Findings

- Hold separate sessions (Staff, HCBS, NFs) to isolate group-specific issues
- Involve all impacted by NF LOC model, directly or indirectly
- Use neutral third party to facilitate public forums
- Choice a centralized location with advance notice of dates/times
- Plan to share resource material for non-attendees
- Allowance for anonymous feedback
- Create a stakeholder advisory team to provide:
  - a continuous, transparent, data-driven process
  - ongoing, clear communication and updates
  - evidentiary examples of the three initial project goals
Technical Assistance Area: LOC Model Findings

• Always remember the audience of the services and supports
• Benchmark against nationalized aggregated data, when possible
• Case study testing imperative to determine efficacy of the proposed model
• Reflect state needs while maximizing the limited number of resources available to consumers
• Actively monitor algorithm changes, especially newly created or eliminated categories
• Be able to quickly implement adjustments when warranted
• Expeditiously inform residents displaced by new model
• Assist non-qualifying and at-risk residents with community services/supports: faith-based, community, and non-profit organizations
Out of Scope Technical Assistance: Process Administration Findings

- First stakeholder meeting yielded significant number of procedural issues
- Existing gaps compromise the ability to assess eligibility criteria and assign proper service and supports properly
- Not evaluating processes and procedures for effectiveness could jeopardize success of new model
- Efforts made to capture these process concerns and are summarized in TA report
- Recommendations include employing certified assessors for consistency, consider mobile assessments, and move toward a case mix integration
Missouri TA Report

• Direct link to report: https://health.mo.gov/seniors/hcbs/pdf/levelofcaretransformation.pdf

• Link to report will be available on Missouri LOC Transformation website

• Physical copies available at cost

• Significant findings and updates will be posted to website going forward
Final Words: New NF LOC Structure & Ecosystem

Transparency is key to success. In order to make sure we have built something that gets the right services to the right people, we have to ask for perspectives of those who need care and those who provide the care, as well as all Missouri taxpayers.

~Jessica Bax, Director of the DHSS’ Division of Senior and Disability Services
Missouri's Level of Care Eligibility Criteria Reimagined
