Prioritizing and Targeting Nutrition Services to Address Nutritional Risk

Holly Greuling RD, LD/N
Nutritionist, Office of Nutrition and Health Promotion Programs
Administration on Aging
Administration for Community Living
U.S. Department of Health and Human Services
Nutrition
An Integral Part of Health Care

Need adequate nutrition to support:

– Health
– Functionality
– Ability to remain home in the community.
Inter-related Factors Affecting the Nutritional Well-Being of Older Adults
The purposes of this part are—
(1) to reduce hunger and food insecurity;
(2) to promote socialization of older individuals; and
(3) to promote the health and well-being of older individuals by assisting such individuals to gain access to nutrition and other disease prevention and health promotion services to delay the onset of adverse health conditions resulting from poor nutritional health or sedentary behavior.
Definitions Used:

- **Hunger**
  - a feeling of discomfort or weakness caused by lack of food, coupled with the desire to eat.

- **Food Insecure**
  - lacking reliable access to a sufficient quantity of affordable, nutritious food.

- **Malnutrition**
  - lack of proper nutrition, caused by not having enough to eat, not eating enough of the right things, or being unable to use the food that one does eat.

- **Nutrition Risk**
  - Quantifying an individual's risk of being at poor nutritional status or developing malnutrition.

- **Nutrition Screening**
  - The process of identifying characteristics known to be associated with nutrition programs with purpose of identifying individuals who are malnourished or at nutrition risk.

- **Nutritional Assessment**
  - A comprehensive evaluations to define nutrition states, including medical history, dietary history, anthropometric measurements and laboratory data.
Food Insecure Older Adults

More likely to have adverse health consequences than food secure older adults

• 50 % more likely to be diabetic
• 14 % more likely to have high blood pressure
• 60% more likely to have congestive heart failure or have had a heart attack
• 2 times more likely to report fair/poor general health
• 3 times more likely to suffer depression
• 2 times more likely to report gum disease or asthma

The Health Consequences of Senior Hunger in the US: Evidence from the 1999-2010 NHANES. NFESH
Nutrition Services
OAA Title III, Part C

• Services required to be provided:
  – Meals,
  – nutrition education and
  – nutrition counseling
  – Other nutrition services based on needs of participants

• Services that may be provided:
  – Nutrition screening and assessment, if appropriate

• Services that cannot be funded:
  – Vitamin/mineral supplements
Federal Requirement:
State Program Report Data Definitions

**High Nutritional Risk** (person) – An individual who scores six (6) or higher on the DETERMINE Your Nutritional Risk checklist published by the Nutrition Screening Initiative.
The warning signs of poor nutritional health are often overlooked. Use this checklist to find out if you or someone you know is at nutritional risk.

Read the statements below. Circle the number in the yes column for those that apply to you or someone you know. For each yes answer, score the number in the box. Total your nutritional score.

<table>
<thead>
<tr>
<th>Statement</th>
<th>YES</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>I have an illness or condition that made me change the kind and/or amount of food I eat.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>I eat fewer than two meals per day.</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>I eat few fruits or vegetables, or milk products.</td>
<td></td>
<td>2</td>
</tr>
<tr>
<td>I have three or more drinks of beer, liquor or wine almost every day.</td>
<td></td>
<td>2</td>
</tr>
<tr>
<td>I have tooth or mouth problems that make it hard for me to eat.</td>
<td></td>
<td>2</td>
</tr>
<tr>
<td>I don't always have enough money to buy the food I need.</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>I eat alone most of the time.</td>
<td></td>
<td>1</td>
</tr>
<tr>
<td>I take three or more different prescribed or over-the-counter drugs a day</td>
<td></td>
<td>1</td>
</tr>
<tr>
<td>Without wanting to, I have lost or gained 10 pounds in the last six months</td>
<td></td>
<td>2</td>
</tr>
<tr>
<td>I am not always physically able to shop, cook and/or feed myself.</td>
<td></td>
<td>2</td>
</tr>
</tbody>
</table>

Total your nutritional score. If it's:

0-2  Good! Recheck your nutritional score in 6 months.

3-5  You are at moderate nutritional risk. See what can be done to improve your eating habits and lifestyle. Your office on aging, senior nutrition program, senior citizens center or health department can help. Recheck your nutritional score in 3 months.

6 or more  You are at high nutritional risk. Bring this checklist the next time you see your doctor, dietitian or other qualified health or social service professional. Talk with them about any problems you may have. Ask for help to improve your nutritional health.

Remember that warning signs suggest risk, but do not represent diagnosis of any condition. Turn the page to learn more about the Warning Signs of poor nutritional health.

High Nutritional Risk (person) – An individual who scores six (6) or higher
SPR 2012, Clients

Number of Persons Served at High Nutrition Risk: Congregate Meals

State Program Reports 2012
DETERMINE Your Nutritional Risk checklist

• AoA uses the DETERMINE Your Nutritional Risk checklist to characterize the population served
• AoA does not use the DETERMINE Your Nutritional Risk checklist to determine malnutrition
• AoA does not use the DETERMINE Your Nutritional Risk checklist as a Performance Measurement Tool
DETERMINE Your Nutritional Risk checklist
Attributes

• It is easily scored
• It is brief
• It provides a snapshot of a person’s nutritional risk
• Inexpensive
• Reliable
• Validated
DETERMINE Your Nutritional Risk checklist

Limitations

- Some questions yield discordant responses
- Some questions are not clearly stated
- It was not intended to be used as a reassessment tool
- It was not intended to be a prioritization tool
Targeting Criteria in the OAA

- Greatest economic need
- Greatest social need
- Low-income
- Low-income minorities
- Rural individuals
- Limited English proficiency
- Those at risk of institutionalization
Can Your Agency Serve Everyone in Need?

• YES
  – Fantastic

• NO
  – Wait list
  – Reprioritizing, if so what tool do you use?
Prioritization often Includes

- Age
- Lives alone
- Income
- ADLs and IADLs
- Nutrition Screening
- Chronic health problems
- Assistance in the home (Reliable)
- Other services
Prioritization

• What entity developed your prioritization policy?
  – State
    • Example: California
  – AAA
    • Example: Oklahoma
  – Local Level
    • Example: Tarrant County, TX
Prioritizing and Targeting Nutrition Services to Address Nutritional Risk

Ucheoma Akobundu, PhD, RD
Director of Project Management and Impact
Meals on Wheels Association of America
AAA Example: Oklahoma

Current assessment tool is:

- **Part I is 5 pages**
  - All services; includes Determine Your Nutritional Health
- **Part II is 2 pages**
  - In-home services; ADLs & IADLs to determine if home bound)
- **Change of Status is 2 pages**
  - All services; bi-annually for home bound and annually for others

Tool is used for

- Intake
- Reassessment
- Update
AAA Example: Oklahoma

New method (SFY 2015)

- Unbundle services (AAA RFPs)
- Increase competition (develop new potential providers)
- Use one standardized intake form (all OR service providers)
  - All program participants will be updated *annually*
  - Responsibility will lie with participant to inform the program of changes
  - Nutrition programs will utilize a *Red Flag policy*
  - OR service providers will enter units into AIM database and will make referrals through AIM to OAA services
    ~ Report and track referrals to other services for follow up
Texas Department of Aging and Disability Services

- Require nutrition programs funded by the Older Americans Act and Area Agencies on Aging (AAA) providing nutrition counseling to identify persons at high nutritional risk.

- Individuals at high nutritional risk are defined by AoA as individuals who score “six (6) or higher on the DETERMINE Your Nutritional Health checklist published by the Nutrition Screen Initiative.”

- The DETERMINE Your Nutritional Health checklist must be completed annually for all consumers receiving congregate meals, home delivered meals or nutrition counseling.
Local Example: Meals on Wheels of Tarrant County, TX

- Nutrition risk screening is facilitated by registered dietitians and a Mini Nutrition Assessment Short Form is used to screen each enrolled participant.
Prioritization Practices Used by Selected States

- Discussion webinars are hosted quarterly by the National Resource Center on Nutrition and Aging to encourage the sharing of both successes and challenges regarding nutrition program administration faced at the state levels.

- The first discussion webinar, “Prioritization and Targeting Nutrition Services” was offered on April 22, 2014.

- Current practice among State Unit staff was assessed specific to assessing eligibility for home-delivered meals.

</table>
Prioritization Practices Used by Selected States

• The principal methods used for screening for home-delivered meal (HDM) eligibility is an in-person contact, followed by telephone call. Similar results seen for HDM assessment.

• The majority of respondents noted that client reassessment occurs annually (62%) – fewer states reassess for HDM semi-annually (33%) or quarterly (5%).
Rationale for Targeting and Prioritization

• **Targeting**: Guided by the requirements of the Older Americans Act, providers are to target older consumers with the greatest economic and social need, and those at risk of institutional placement.

• **Prioritizing**: Making services available to high risk groups – facilitated by **screening**. Preference may be given to targeted groups with particular attention to:
  - Low-income older individuals, including low-income minority older adults
  - Older individuals with limited English proficiency
  - Older individuals residing in rural areas

• Ensure adequate resources for program implementation and the ability to continually address the needs of vulnerable older adults (through periodic **assessment**).
Nutrition Screening / Nutrition Assessment

Nutrition Screening
- Process of identifying individuals at risk for poor nutritional status
- Short process, limited prioritized questions
- Performed by non healthcare professional

Nutrition Assessment
- Process of determining an individuals’ nutritional status
- Long process, includes medical history, diet history, physical examination, anthropometric parameters, laboratory values, economic, food access, IADL/ADL impairments, individual / family information
- Performed by a healthcare professional e.g. dietitian
Changing Healthcare Environment & Need for Business Acumen

- Demographics
- Client base
- Societal demands
- Resources: government/public funding
- Technology
- Sustainability
Figure 1. Cumulative distribution of personal health care spending, 2009.

Top 1% of spenders account for >20% of spending ($275 billion).

Top 5% of spenders account for almost half of spending ($623 billion).

Factors that influence health-related quality of life and the aging process

1. Medical/Health Status
   - Presence of chronic or acute illnesses
   - Medication use
   - Sensory changes—taste, smell, appearance, texture
   - Oral health

2. Physical/Functional Status
   - Physical limitations
   - Balance
   - Physical strength and endurance
   - Physical activity

3. Cognition
   - Change in mental status
   - Depression
   - Emotional needs
   - Habitual food intake
   - Health/nutrition-related beliefs
   - Advertising

4. Environmental
   - Living situation
   - Economics
   - Cultural beliefs and traditions
   - Religious beliefs and traditions
   - Environment
   - Lifestyle
   - Access to food and food preparation
   - Socialization

Risk Factors for Institutionalization/Hospital Admission

- **Demographic**
  - Older age

- **Medical/Health**
  - Stroke
  - Incontinence
  - Functional limitations (ADLs/IADLs)
  - History of falls
  - Self-rated health
  - Polypharmacy

- **Health service use**
  - >6 Doctor visits/year

- **Nutrition**
  - Eating problems: chewing and swallowing
Nutrition Screening and Assessment Tools

These materials are developed and distributed by the Nutrition Screening Initiative, a project of:

- American Academy of Family Physicians
- American Dietetic Association
- The National Council on the Aging, Inc.
Malnutrition Screening Tool (MST)

**STEP 1: Screen with the MST**

1. Have you recently lost weight without trying?
   - No: 0
   - Unsure: 2

2. If yes, how much weight have you lost?
   - 2-13 lb: 1
   - 14-23 lb: 2
   - 24-33 lb: 3
   - 34 lb or more: 4
   - Unsure: 2

   **Weight loss score:**

3. Have you been eating poorly because of a decreased appetite?
   - No: 0
   - Yes: 1

   **Appetite score:**

**Add weight loss and appetite scores**

**MST SCORE:**

**STEP 2: Score to determine risk**

- **MST = 0 OR 1**
  - **NOT AT RISK**
  - Eating well with little or no weight loss
  - If length of stay exceeds 7 days, then rescreen, repeating weekly as needed.

- **MST = 2 OR MORE**
  - **AT RISK**
  - Eating poorly and/or recent weight loss
  - Rapidly implement nutrition interventions. Perform nutrition consult within 24-72 hrs, depending on risk.

**STEP 3: Intervene with nutritional support for your patients at risk of malnutrition.**

**Notes:**

---

©2013 Abbott Laboratories
8920 May 2013 Litho in USA
www.abbottnutrition.com/toolkit

Abbott Nutrition
The Malnutrition Universal Screening Tool (MUST)

**Step 1**
BMI score

- **BMI kg/m²** Score
  - >20 (>30 Obese) = 0
  - 18.5-20 = 1
  - <18.5 = 2

**Step 2**
Weight loss score

- **Unplanned weight loss in past 3 months** % Score
  - <5 = 0
  - 5-10 = 1
  - >10 = 2

**Step 3**
Acute disease effect score

- If patient is acutely ill and there has been or is likely to be no nutritional intake for >5 days Score 2

**Step 4**
Overall risk of malnutrition

- Add scores together to calculate overall risk of malnutrition
- Score 0 Low Risk  1 Medium Risk  2 or more High Risk

**Step 5**
Management guidelines

- **0 Low Risk**
  - Routine clinical care
  - Repeat screening
  - Hospital – weekly
  - Care Homes – monthly
  - Community – annually for special groups (e.g., those >70 yrs)

- **1 Medium Risk**
  - Observe
  - Document dietary intake for 3 days
  - If adequate – little concern and repeat screening
    - Hospital – weekly
    - Care Home – at least monthly
    - Community – at least every 2–3 months
  - If inadequate – clinical concern
    - Follow local policy, set goals, improve and increase overall nutritional intake, monitor and review care plan regularly

- **2 or more High Risk**
  - Treat
    - Refer to dietitian, Nutritional Support Team or implement local policy
    - Set goals, improve and increase overall nutritional intake
    - Monitor and review care plan
      - Hospital – weekly
      - Care Home – monthly
      - Community – monthly
    - Unless detrimental or no benefit is expected from nutritional support (e.g., minor illness)

All risk categories:

- Treat underlying condition and provide help and advice on food choices, eating, and drinking if necessary.
- Record malnutrition risk category.
- Record need for special diets and follow local policy.

Obesity:

- Record presence of obesity. For those with underlying conditions, these are generally controlled before the treatment of obesity.

Re-assess subjects identified at risk as they move through care settings.
The Mini Nutritional Assessment Short Form (MNA-SF)

Screening

A Has food intake declined over the past 3 months due to loss of appetite, digestive problems, chewing or swallowing difficulties?
- 0 = severe decrease in food intake
- 1 = moderate decrease in food intake
- 2 = no decrease in food intake

B Weight loss during the last 3 months
- 0 = weight loss greater than 3 kg (6.6 lbs)
- 1 = does not know
- 2 = weight loss between 1 and 3 kg (2.2 and 6.6 lbs)
- 3 = no weight loss

C Mobility
- 0 = bed or chair bound
- 1 = able to get out of bed / chair but does not go out
- 2 = goes out

D Has suffered psychological stress or acute disease in the past 3 months?
- 0 = yes
- 2 = no

E Neuropsychological problems
- 0 = severe dementia or depression
- 1 = mild dementia
- 2 = no psychological problems

F1 Body Mass Index (BMI) (weight in kg) / (height in m²)
- 0 = BMI less than 19
- 1 = BMI 19 to less than 21
- 2 = BMI 21 to less than 23
- 3 = BMI 23 or greater

IF BMI IS NOT AVAILABLE, REPLACE QUESTION F1 WITH QUESTION F2. DO NOT ANSWER QUESTION F2 IF QUESTION F1 IS ALREADY COMPLETED.

F2 Calf circumference (CC) in cm
- 0 = CC less than 31
- 3 = CC 31 or greater

Screening score (max. 14 points)

12 - 14 points: Normal nutritional status
8 - 11 points: At risk of malnutrition
0 - 7 points: Malnourished
Nutrition Assessment Tools

- Nutrition Screening Initiative
  - Level 1, Level 2

- Mini Nutrition Assessment (Assessment Portion)
## Nutrition Screening Initiative: Level I and Level II Screens

<table>
<thead>
<tr>
<th>Primary User</th>
<th>LEVEL I SCREEN</th>
<th>LEVEL II SCREEN</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Social workers and health care professionals</td>
<td>Physicians and other qualified health care professionals</td>
</tr>
<tr>
<td>Data Evaluation</td>
<td>Height, Weight, Dietary data, Daily food intake, Living environment, Functional status</td>
<td>Height, Weight, Dietary data, Daily food intake, Living environment, Functional status, Laboratory and anthropometric data, Clinical features, Mental/cognitive status, Medication use</td>
</tr>
</tbody>
</table>

Complete the following screen by interviewing the patient directly and/or by referring to the patient chart. If you do not routinely perform all of the described tests or ask all of the listed questions, please consider including them but do not be concerned if the entire screen is not completed. Please try to conduct a minimal screen on as many older patients as possible, and please try to collect serial measurements, which are extremely valuable in monitoring nutritional status.

**Anthropometrics**

Measure height to the nearest inch and weight to the nearest pound. Record the values below and mark them on the body mass index (BMI) scale to the right. Then use a straight edge (paper, ruler) to connect the two points and circle the spot where this straight line crosses the center line (body mass index). Record the number below; healthy older adults should have a BMI between 24 and 27; check the appropriate box to flag an abnormally high or low value.

- **Height (in):** _____
- **Weight (lbs):** _____
- **Body mass index (weight/height²):** _____

Please place a check by any statement regarding BMI and recent weight loss that is true for the patient.

- Body mass index <24
- Body mass index >27
- Has lost or gained 10 pounds (or more) of body weight in the past 6 months

Record the measurement of mid-arm circumference to the nearest 0.1 centimeter and of triceps skinfold to the nearest 2 millimeters.

- **Triceps skinfold (mm):** _____
- **Mid-arm muscle circumference (cm):** _____

Refer to the table and check any abnormal values:

- **Triceps skinfold <10th percentile**
- **Triceps skinfold >95th percentile**

*Note: Mid-arm circumference (cm) = \(0.31 \times \text{triceps skinfold (mm)}\) = Mid-arm muscle circumference (cm)*

For the remaining sections, please place a check by any statements that are true for the patient.

Patients in whom you have identified one or more major indicators of poor nutritional status require immediate medical attention; if minor indicators are found, ensure that they are known to a health professional or to the patient’s own care or social service professional (dietitian, nurse, dentist, case manager, etc.).

*Handout
Tools In Development and Use
2013-2014 “More Than a Meal” Research Study

Funding from AARP Foundation to the Meals on Wheels Association of America

*Lead Researcher:* Dr. Kali Thomas, Brown University

*Goal:* Assess the effectiveness of HDM delivery modalities on a variety of client outcomes

*Questions were taken from:*
- 2012 National Health and Aging Trends Survey (NHATS)
- 2012 Health and Retirement Survey (HRS)

*Measures*
- Self-Rated Health
- Fear of Falling
- Loneliness & Depression
- Difficulty Shopping and Cooking
Data Collection Instruments are Publically Available
Sample questions from NHATS

• Are there times when you are not physically able to shop for groceries?
  • Yes, No, Refused, Don’t Know

• In the last month, did you worry about falling down?
  • Yes, No, Refused, Don’t Know

• Do you take 3 or more prescribed or over-the-counter drugs each day?
  ▪ Yes, No, Refused, Don’t Know

• Would you say that in general your health is...
  ▪ Excellent, Very Good, Good, Fair, Poor, Refused, Don’t Know
Meals on Wheels of Tarrant County – Current Tools

Client Assessment Tools include:

✔ 2011 National Health Interview Survey – Family Access to Healthcare & Utilization
✔ Healthy Days Core Module
  ▪ Centers for Disease Control and Prevention

✔ Group’s EQ-5D
  ▪ EuroQol

✔ Risk Factors for Hospitalization and Emergent Care Assessment Tool
  ▪ Georgia QIO – the Medicare Quality Improvement Organization
• How many different times did you stay in the hospital DURING THE PAST 6 MONTHS? ____________

• I feel confident in my ability to manage my health.
  ▪ 7-item Likert scale: Not true at all – somewhat true – very true

• Risk Factors Checklist (check all that apply)
  □ 9 or more medications
  □ More than 2 secondary diagnoses
  □ Low socioeconomic status or financial concerns
  □ Lives alone
  □ Open wound (stasis, pressure, diabetic ulcer, open surgical wound)
  □ Help with managing medication
  □ Confusion any level
  □ Dyspnea any level
  □ Short life expectancy
Discussion

• A variety of health and nutrition risk screening and assessment tools are available to support targeting and prioritization objectives.

• States have the opportunity to advance the state of current practice mandated at the federal level to best suit the needs of the populations they serve.

• A diversity of resources is available via the National Resource Center on Nutrition and Aging (NRC) - supported by a grant award from the Administration Aging to the Meals on Wheels Association of America.

• Available resources:
  ▪ Online Resource Library
  ▪ Webinars (upcoming: September 23, 2014 | Safe foods for seniors begin at home
  ▪ State Unit on Aging staff Listserv
