Nevada COVID-19 Aging Network (NV CAN) Rapid Response

Final Plan: March 26, 2020

Rationale:

Directly alongside the public health, health care and financial crises of the Coronavirus (COVID-19) pandemic sits an AGING SERVICES CRISIS that has the potential to negatively impact all elder Nevadans. However, the severity of its impact can be mitigated with an integrated, statewide rapid mobilization of state, county, academic, community-based and volunteer resources.

Elders are disproportionately affected by COVID-19 in terms of the impact of the virus on their health, with estimated mortality rates elevated for all Nevadans ages 50 and older, and mortality potentially reaching as high as 25% among people 80 years and older. Simply put, all elder Nevadans need to stay home for the foreseeable future. This means that the statewide Aging Services Network, led by the Nevada Aging and Disability Services Division (ADSD) and supported by county senior services agencies and numerous community-based aging services organizations, needs to immediately mobilize an integrated, well-coordinated effort to meet elders’ life-sustaining and urgent physical, social and emotional needs. The Aging Services Network has historically served low-income and high-risk elders with multiple chronic conditions and cognitive impairment by offering a wide range of support and education services; doing so with a workforce already stretched thin. Today, in this present crisis, ALL elders are at-risk, homebound elders. Thus, all 454,221 elder Nevadans are at risk of death, serious illness, social isolation, food insecurity and lack of needed medications.

The entire Aging Services Network must be immediately mobilized for rapid action around a single goal with key, achievable objectives. Together, Nevada CAN and will sufficiently support elders in their homes to keep them safe, well-supplied and connected to needed social and health resources.

NV CAN Goal:

To mobilize all available resources and ensure that every elder Nevadan has access to medical, social and daily essentials in their home, and thus reduce COVID-19 exposure and impact, by ensuring all elders are safe, that their basic daily requirements and medical needs are met, and that they are free from social isolation during this time of physical separation.

NV CAN Objectives:

1) To communicate actively with all homebound, community-dwelling elders and aging service providers through widespread dissemination of credible information and resource availability.

2) To mobilize a core of volunteers to connect via telephone and internet with homebound, community-dwelling elders to check on basic, medical and social service needs, as well as to engage them in meaningful one-to-one social interactions and virtual small-group peer support opportunities.

3) To assess individual needs and deliver tele-social work as well as primary care, geriatrics, psychiatric and other available clinical services via telemedicine to homebound, community-dwelling elders.

4) To assess individual needs for support in basic daily requirements of homebound, community-dwelling elders (i.e., food, medication, transportation, etc.) and mobilize county senior service agencies, volunteers, and community aging services organizations in meeting elder needs through home delivery.
**Major Activities:**

1) **Mobilize statewide media campaign** to broadly advertise and direct elder Nevadans (60+), other concerned citizens, potential volunteers and donors to the NV CAN website. This effort will be led by Communications and Outreach Action Team (COAT).

2) **Launch and maintain NV CAN website** as an age- and dementia-friendly website to include:
   a) Information and resource link: Connects to Nevada Health Response website, as well as state and federal websites for accurate information and updates
   b) Online form to request needed services and resources (completed by, or on behalf of, an elder)
   c) Program and resource page: Information regarding available statewide aging services and programs
   d) Volunteer sign-up portal and donation button to contribute time and resources to NV CAN
   e) Aging network provider link: Information, resources and funding opportunities for provider network

3) The **online form** links to a database accessed by ADSD / Aging and Disability Resource Center (ADSD) case managers who immediately triage and connect elders to service providers based on reported needs. Case managers use an easy-to-follow list of service providers in each county, as well as various statewide resources, to facilitate service connection in collaboration with three NV CAN Action Teams.

4) **Elders connect with NV CAN services**

**Essential Daily Needs:** The **Food and Medication Action Team** (FMAT) will work with county services in each of Nevada’s 17 counties to deliver food and medications, bringing enhanced county capacity through mobilizing volunteers into a new County Compassion Corps to either grocery shop or pick-up packages at pre-determined locations and deliver to elders. The NV CAN Leadership Team will aim to establish relationships with grocery store chains statewide to pre-pack essential groceries for easy pick-up and delivery, with an account charged to ADSD. Food and medication recipients with means, or any community member, can donate to the fund, managed by ADSD.

**Virtual Social Support:** The **Social Support Action Team** (SSAT) will provide two types of social support, including regular checks of elder status and needs. Elders can opt for either or both options.

A. One-to-One Check-in Calls: Will leverage service-learning students from NSHE institutions as well as other aging service and community volunteers who will receive training, a client list and reporting tools to support a group of specific individuals (10 elders per volunteer) on an ongoing basis, with calls at least twice per week, engaging in meaningful social interaction and utilizing the online form as a resource.

B. Small-Group Peer Support: Will recruit and train a network of volunteers to create virtual ‘NESTs’ for all interested elders via Zoom and teleconference. [Note: NEST stands for Nevada Ensures Support Together.] NESTs provide facilitated small-group peer support. It’s not just about what NV CAN do for elders, but also what elders can do for each other.

**Telehealth Resources:** The **Telehealth Action Team** (THAT) will manage two clinical services.

A. Tele-Social Work: Licensed social workers from aging services organizations and NSHE student interns will deliver assessment and case management services.

B. Telemedicine: Licensed health care professionals will use integrated clinical referral process to deliver primary care, psychiatry, geriatrics and other clinical services as available.
**NV CAN Rapid Response Leadership Team:**

**Director:** Dena Schmidt, Administrator, NV Aging and Disability Services Division (ADSD), Carson City

**Co-Director:** Jeff Klein, CEO, Nevada Senior Services (NSS), Las Vegas

**Co-Director:** Peter Reed, PhD, MPH, Director, UNR Med Sanford Center for Aging (SCA) and Professor of Community Health Sciences (CHS), Reno

**Co-Director:** Jennifer Carson, PhD, Director, UNR CHS Dementia Engagement, Education and Research (DEER) Program / Dementia Friendly Nevada, Reno (works extensively with rural NV communities)

Network Mobilization: **Entire statewide network** of state- and local-government service agencies, community-based aging-services organizations and university-based resources will support an integrated response to the needs of homebound elders in Nevada during the COVID-19 aging-services crisis. Specific community-service delivery partners will be identified and engaged throughout launch and implementation.

---

### Dena Schmidt, Administrator, ADSD
- Government Relations (State- and County-level Engagement)
- Public Relations (Media and Website)
- Aging and Disability Services Division Mobilization
- Resource Allocation
- **Action Team Lead** for Communications and Outreach

---

### Jeff Klein, NSS
Policy, Regulatory and Resource Advocacy Lead

**Service Delivery Role:**
Action team lead for fulfilling elder needs related to accessing essentials for everyday life.

**Leadership for:**
- **Food and medication** distribution network in partnership with:
  - County senior service agencies
  - Community-based aging-service providers
  - Community volunteers

---

### Jennifer Carson, UNR CHS
Volunteer Mobilization and Social Support Lead

**Service Delivery Role:**
Action team lead for volunteer recruitment, training and mobilization to increase social support and deploy volunteers to other NV CAN core functions.

**Leadership for:**
- Social support options:
  - One-to-one check-in calls
  - Small-group peer support (NEST)

---

### Peter Reed, UNR Med SCA
Aging-services Network Mobilization Lead

**Service Delivery Role:**
Action team lead for **telehealth** delivering online health and social services.

**Leadership for:**
- Network of telehealth services:
  - Tele-social work
  - Telemedicine (primary care, geriatrics, psychiatry and others as available)

---

**NV CAN Action Teams:** Communications and Outreach Action Team (COAT); Food and Medication Action Team (FMAT); Social Support Action Team (SSAT); and Telehealth Action Team (THAT)
Partners Mobilized:
- Nevada Aging and Disability Services Division
- County Senior Services / Social Service Agencies (in all 17 counties)
- 27 Nevada Tribal Governments and the Inter-Tribal Council of Nevada
- Community-based aging services organizations (current ADSD grantees and others)
- Nevada Geriatric Workforce Enhancement Programs (UNLV and UNR GWEPs)
- NSHE general undergraduate student volunteers
- NSHE medical, nursing, social work, public health and physician assistant programs, as available
- Existing community volunteers in the Aging Services Network
- New community volunteers
- Clinical social workers and social work student interns
- Telemedicine medical providers (primary care, geriatrics, psychiatry and others)
- Local and statewide media outlets

Key Activities, Proposed Timeline and Accountability for Rapid Mobilization:

*Expected NV CAN launch by March 30, 2020. **Anticipate 90 – 100 days of full implementation.
Integrated Aging Services Flow & Triage Strategy:

Media Campaign and Service Agency Outreach:
Elders or Surrogates Complete Online Needs Form or Call for Service
Lead: COAT and Community-service Agencies

Case Manager Needs Assessment and Triage
Arrange immediate transport to nearest hospital or clinical site (if needed)
Lead: ADSD / ADRC and 211 Call Center

Daily Essentials Delivery Mobilization
All County Senior Center services in elders’ geographic area made available as necessary (with additional capacity from local aging service partners). Mobilize:
- Food delivery
- Medication delivery
- Pet support
- Transportation

***Supported by County Compassion Corps (CCC)
Lead: FMAT

Needed: County agency volunteer manager increases capacity by coordinating activities of CCC

Social Support Services
Resource Options:
- One-to-one weekly check-in and support
- NEST group peer support and check-ins

Lead: SSAT

Fulfilled by: Core of student and community volunteers

Telehealth Services
Service Options:
- Tele-Social Work Services: Assessment, Case Management and Counseling
- Telemedicine Services:
  - Primary Care Geriatrics
  - Psychiatry
  - Other clinical services as available

Lead: THAT

Fulfilled by: Integrated core of licensed social work and medical professionals with health professions students and interns.

Needed: Integrated referral system / IT support.

General Online Program Offerings
Elders invited to participate in any online programs offered by community-based aging service providers:
- Education
- Wellness
- Social Engagement

Offered online by any aging services organizations.

Needed: Online menu of program offerings
